

Individual Report

Test 17-521

Questioned Documents Examination

Test Summary: Each sample set contained one two-page waiver document for a local 5K race (Q1). A race participant alleged that the waiver had been altered subsequent to her completion of the form. The Q1 waiver was not altered following its completion by the participant. *(Please see the Summary Report for additional summary comments and information.)*

Examination Results & Findings

Based on the findings of your examination, can it be confirmed that the race waiver was altered following its completion by the participant?

Participant
U7835A

Item Q1: E

Response Summary

Response Summary	Q1			
A	0	A: Was Altered	Note: The total does not add up to 213 because not all participants reported a response.	
B	2	B: Was Probably Altered		
C	8	C: Cannot be Determined		
D	53	D: Probably Not Altered		
E	149	E: Not Altered		
Total Participants: 213				

Methods and Observations

Method	Observations	Participant U7835A
Visual Examination	The Q1 document is absent of any trash marks, obliterations, or computer generated characteristics due to technological alteration.	
Handwriting Examination	All handwritten executions are consistent with a single author.	
Microscopic Examination	All signature and initials are wet ink executions ruling out an addition of a paragraph that was added after the execution by participant.	
Overlays	Font, kerning, and leading are consistent between both pages of the waiver which is consistent with a single drafting.	

Conclusions

The Q1 document does not show any characteristics of traits found in altered or manipulated documents. The Q1 document was not found to have been altered after the participant completion, and this is based on the evidence I have been provided.
